

CEILING FIXTURE APPLICATION

The Easiest and Fastest installation for a
Retrofit Light Engine.

Overdrive MPLR is designed with 3 types of unique mounting systems which can be easily mounted to all types of ceiling fixtures..

Overdrive MPLR is also supplied with one set of mounting screws with spring.

Simply connect the wires with the connectors, if the ceiling fixture has already built in sockets, you can simply connect the socket mounting kit to either one of the sockets and then connect to the MPLR. If ceiling fixture is designed with a stem for holding the glass, it can be directly positioned by the screw at the center of the MPLR. If ceiling fittings is designed without stem you can use the set of magnetic screws, simply mount the screws to the MPLR and adjust the distance, then position the MPLR close to the diffuser.

The MLPR is designed to mount to the standard mounting holes of ceiling fixtures. Just push the screws into the mounting holes and twist the MPLR to the end then release the MPLR, the MPLR will be automatically locked into the ceiling fixture.
